

Online MS in Business Cybersecurity

Program Overview

Become proficient in technology and an expert in business through the online Master of Science in Business Cybersecurity (MSBC). In our program, you will gain a foundational understanding of core cybersecurity tenets and learn to drive critical conversations around the greater implications for business operations and resilience. Along with sound technical training, we provide graduates with the fluency to comprehend, communicate and employ business strategies crucial to protecting data—and, accordingly, the bottom line.

Ready to Lead an Emerging Field?

The term “business cybersecurity” may be unfamiliar to some. It won’t likely be for long.

\$10.5 trillion in cybercrime-related damages are expected by 2025. (Cybersecurity Ventures, 2020)

3.4 million professionals are needed to fill the cybersecurity workforce gap. (International Information Systems Security Certification Consortium, 2022)

93% of cyber leader respondents from the 2023 Global Cybersecurity Outlook report anticipate a cybercrime catastrophe in the next two years. (Forbes, 2023)

About the Haslam College of Business

Informed by over 100 years of business education and research, Haslam is accredited by the Association to Advance Collegiate Schools of Business (AACSB). We produce industry leaders with a bias for action who are committed to innovating, advancing the frontier of learning and generating nationally and internationally recognized outcomes that improve the world. We’re entering the field of business cybersecurity at its inception because it’s our duty to align with 21st-century workforce needs, and we’re looking for leaders to join us.
